

Shah Haq

Shah Haq is a business technology solutions expert specializing in business continuity, resiliency, and risk management. A graduate in Electrical Engineering, Shah has applied advanced risk management frameworks to significantly reduce corporate risk exposures and unnecessary technology and business expenses at HP, HP Enterprise, Lucent Technologies, Bell Labs, Nokia, Samsung, and the pharmaceutical giant AbbVie.

Currently, Shah serves as the Director of Engineering and Operations at Oxygen Health Systems, where he leads a team of dedicated professionals focused on improving the technology and commercial applications of various hyperbaric chamber models for personal, franchise, surgical, clinical, and athletic performance use. Backed by evidence-based procedures, Shah has assisted professional teams such as the NY Giants, NY Yankees, Pittsburgh Penguins, San Diego Padres, Minnesota Twins, US Soccer Federation, and others in optimizing their hyperbaric applications. Additionally, Stanford University, as well as numerous thriving surgical centers and clinics from Newport Beach, CA, to businesses of various Florida and Texas counties have sought his expertise for their tailored commercial and clinical hyperbaric applications.
